Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 - 10 and 17 - 22 are drawn combination of optical reflector, LED, heat sink, motor and fan, classified in class 362, subclass 294.
 - II. Claims 11 - 16 are drawn to a method of cooling a light emitting diode in a lamp classified in class 165, subclass 120 (Heat Exchange with impeller or conveyor moving exchange material)

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In the instant case, invention I, apparatus (heat sink, motor and fan,) for cooling a LED has a separate utility and can be used to cool any electrical illumination device or any electrical component.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
